

## **Frameless Glass Barn Door 93 Series**

The Frameless Glass Barn Door is more than a decorative sliding door solution. Elegant in design, this system is completely trackless. Its commercial grade brushed stainless steel system with ball bearing rollers offers a smooth and quiet operation. The 3/8" tempered glass has acid etching on both sides that offers a consistent glass surface look. The opaque glass finish provides utmost privacy while allowing natural light to pass through.

This sleek door system is perfect not only for multi-family residences, but hotels and high-end office spaces, looking to maximize space while adding an urban interior touch.

Hardware: Face mounted stainless steel barn door  
Glass Options: Acid Etched (2-sides)
