

DIVIDERS
by **COX**usa

we believe the best design includes consideration for the comfort and well-being of our end-users. Our collection of urban-inspired interior room dividers, surface mounted sliding doors, wall partitions and pocket doors are all uniquely engineered to adapt to these needs.

at DIVIDERS by COXUSA, we re-think interior spaces + proactively provide innovative, adaptable design solutions to the architect and design community.

WHO WE ARE

Our evolution has been driven by our constant search to understand the ever changing world of today's urban space. We draw inspiration from the often arduous design process as we translate design solutions from concept to manufacturing. Our narrative that functionality and design are the core of innovative product manufacturing demands from us, manufacturers, to remain within the genre of creating products that are aesthetically designed yet functional, relevant, adaptable and sustainable. Our numerous mixed-use projects, multi-family residences, and hotels that we have completed bear evidence to these efforts.

Our ability to carefully listen has resulted in some of our best collaborations yet, fulfilling the sometimes very specific and singular aspirations of our customers. We believe that concepts, thoughts, inspirations, feelings, purpose or intent are in essence important narratives that will continue to define and connect manufacturers like us to architects and designers.

We are collaborators and solution-makers. We thrive in the unconventional and strive to sustain a refined sense of aesthetics to an ever-changing design market.

And proudly, we are Made in America.
